PROFESSIONAL SUMMARY

MSc Business Analytics candidate at Queen's University Belfast with a computer engineering background and three industry roles turning data and AI into business decisions, building client pricing models, automating manual operations and translating market analysis into strategic recommendations. Experienced working across clients, sales and engineering teams to scope problems, analyse operational and financial data and deliver solutions. Seeking to apply structured, data-driven problem-solving to strategy and process transformation in management consulting.

EDUCATION

MSc in Business Analytics | Queen's University Belfast (UK), GIFT City Campus — Feb 2026 - Dec 2026

B.E. in Computer Engineering | Government Engineering College, Gandhinagar | CGPA: 8.24/10 — Aug 2021 - Jun 2024

Diploma in Computer Engineering | R.C. Technical Institute, Ahmedabad | CGPA: 9.92/10 — Aug 2018 - Jul 2021

PROFESSIONAL EXPERIENCE

AI Engineer Intern | Thrifty AI, Noida — Jan 2026 - May 2026

- Translated product requirements into 5+ AI features delivered end to end, coordinating with the engineering team from research through deployment.
- Automated engineering workflows and built internal tools using AI tooling (Claude Code, MCP), speeding up team delivery.
- Tested and optimised features before release, ensuring reliable, usable outcomes for end users.

AI & Business Automation Engineer | Mind Mingle Media, Ahmedabad — Aug 2025 - Jan 2026

- Performed per-minute cost analysis of AI call services and built pricing models for 5+ client proposals; presented them in client sales conversations to support new business.
- Automated 10+ manual business processes (n8n), connecting CRMs, Google Workspace and third-party tools into unified data pipelines and saving ~15 hours/week.
- Deployed a document-intelligence chatbot that resolved 70% of client queries without human support, improving customer self-service.
- Launched voice AI agents handling 500+ calls/month for scheduling and lead qualification, cutting manual follow-up time by 40%.

Full-Stack Developer Intern | Almashines Technologies, Ahmedabad — Jan 2024 - Jun 2024

- Built a poll analytics module that turned user response data into structured, decision-ready reports for stakeholders.
- Designed a data migration system offloading 50,000+ records from primary tables, improving query performance by ~30%.
- Consolidated duplicate user accounts, strengthening data integrity and downstream reporting accuracy.

PROJECTS & CASE COMPETITIONS

- **Drishtikon 2026 Case Competition - Tazzo Bikes Strategy:** Diagnosed a startup's ~3x cost-to-revenue ratio using Porter's Five Forces and competitor benchmarking; scored three strategic options and recommended a phased plan shifting fleet sourcing to a peer-sourced model, with KPIs targeting a cost ratio below 2x.
- **Reliance TUP XII 2026 - JioSaath:** Pitched an elder-care service built on Jio, Reliance Retail and Netmeds; sized a ₹107 Cr revenue opportunity at 1% penetration, modelled unit economics (~44% margin) and designed a 1,000-household pilot.
- **Targeting Smarter - AI SaaS Market Segmentation:** Clustered 49,191 survey responses across 14 industries to find segments with high AI adoption but weak cost governance; turned them into go-to-market recommendations on pricing, spend visibility and ROI.
- **Gujarat Tourism Investment Dashboard:** Evaluated ₹6,500 crore of tourism investment opportunities and presented investment-priority recommendations through an interactive dashboard.

LEADERSHIP & ACHIEVEMENTS

- **CMI Level 5** - Certificate in Management and Leadership (513 : Managing Projects to Achieve Results)
- **Top 7 Finalist** - National Entrepreneurship Challenge (NEC) 2022, IIT Bombay (nationwide)
- **3rd Place** - MesoHacks 2022 (global hackathon)
- **Selected -** Google Developer Startup Bootcamp 2022
- **Founding Member** - Entrepreneurship Cell, GEC Gandhinagar (2022–2023): defined the cell's identity and communication strategy, created data-driven campaigns that grew audience engagement.

SKILLS

Consulting & Business: Data analysis, Process mapping, Market segmentation, Pricing & Cost modelling, Requirements gathering, Stakeholder presentations

Analytics & Tools: Excel, PowerPoint (slide decks), Tableau, Power BI, Alteryx, SQL, Jira

AI & Automation: LangChain, RAG, OpenAI API, Claude Code, n8n, Zapier
